

Course Copy

The Course Copy feature allows instructors to copy content from courses they are currently teaching or have taught in previous semesters, into courses that they will be teaching. This is especially useful if an instructor teaches the same course from semester to semester. Please see the notes and chart at the end of this tutorial for more detail on how different parts of the course will be copied.

Note: To use Course Copy, the user must be listed as 'instructor' or 'TA' in both courses. Also, the course to be copied *into* must be an **existing course**. For example, if an instructor wants to copy an existing fall course to a spring course, the course shell for the spring course must already be available (from ISIS) to perform the course copy.

Using Course Copy:

1. Login in the course you wish to copy content from.
2. Once inside your course, navigate to the Control Panel (lower left side of the screen) and choose 'Packages and Utilities' then 'Course Copy.'

3. For Copy Type, select 'Copy Course Materials into an Existing Course.'

1. Select Copy Type

Select Copy Type

Copy Course Materials into an Existing Course ▼

4. Click 'Browse' to locate the destination course.

2. Select Copy Options

* Destination Course ID

Note: If you have tests or assignments in your course, you must select this option if you want them to be deployed in your destination course.

Note: Selecting 'Availability' may cause your destination course to be available to students sooner than you are ready, depending on the setting in your source course.

Note: If you have entered duration dates in your source course, this may cause your destination course to be hidden from students.

7. In the File Attachments section, it is recommended to select 'Copy links and copies of the content.'

FILE ATTACHMENTS

Select an option for copying your file attachments. If content will be reused in a different course, copying links and copies of the content is the recommended option. Click **More Help** for additional information.

Course Files

- Copy links to Course Files
- Copy links and copies of the content
- Copy links and copies of the content (include entire course home folder)

8. Leave the 'Include Enrollments in the Copy' option unchecked. Click Submit.

ENROLLMENTS

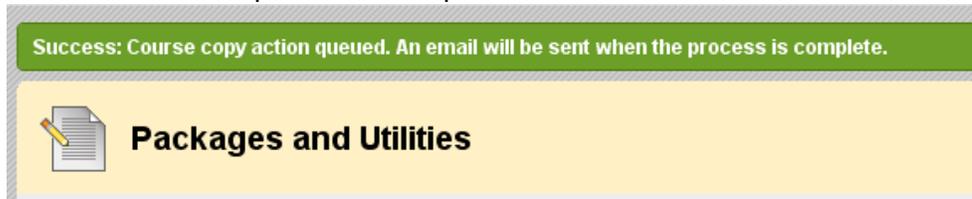

Copy enrollments for all users in the course. This option does not copy user records in the course, such as grades. User records copied with Exact Copy.

Enrollments

Include Enrollments in the Copy

9. You should see a message that the request has been queued and that you will receive an email when the process is complete.

10. When the process has completed, click on the destination course to make sure all of the requested content has been successfully copied and begin cleanup as necessary.

Please Note:

- Some cleanup of the new site will probably be necessary. For example, the destination course contains a standard template menu that will be merged with your course menu when the course is copied over. Duplicate and/or unwanted entries may appear in the menu when the course copy is complete – feel free to delete anything that is unwanted.
- Blog, Journal, and Wiki entries are not copied over to new sites – only the titles of these items are copied.
- With the Discussion Board tool, you have the option of copying over **only** the forums, or the forums with all of the 'starter posts' of each thread, with the authors of those posts changed to 'anonymous.' Replies to threads are not copied.

See chart below for more detail:

Tool/Area	Cleanup after copy	Target Notes
Content Area	Dates	<p>Selecting a content area alone for copy will not copy over any tests "deployed" in that content area nor will it copy assignments in the content area.</p> <p>To copy over tests while keeping them deployed in a content area, all content areas in question and "Tests, Surveys, and Pools" and "Grade Center Columns and Settings" must all be selected.</p> <p>To copy over tests without keeping them deployed, just select "Tests, Surveys, and Pools". All copied tests will be undeployed.</p> <p>To copy over assignments, the content area and "Grade Center Columns and Settings" must both be selected.</p>
Adaptive Release Rules for Content	Dates	Works as expected
Announcements	Dates	Works as expected
Blogs		Individual entries and comments not copied
Calendar	Dates	(All dates are copied exactly, which may be undesirable for some courses in the next semester)
Collaboration Sessions		(Collaboration sessions when copied will only make a duplicate session, i.e. copying a session won't allow students from one class to join that session of another)
Contacts		Works as expected
Discussion Board	Unwanted student created threads	Only threads are copied; replies to threads are not. The authors of threads are copied over as "anonymous" (even if the poster is in both courses).
Early Warning System Rules		(If the associated item in "Grade Center Columns and Settings" is not copied, then the copied rule will be associated with "null")
Glossary		Works as expected
Grade Center Columns and Settings	Stray/duplicate grade columns	Columns attached to a test or assignment are copied, even if the test or assignment itself is not.
Group Settings		The group names and options are copied only. No items in the blog, forum, wiki, file exchange, etc are copied.
Journals		Individual Journals and comments not copied
Rubrics		Works as expected
Settings		Options on the "Style" page on the control panel under Customization are copied. Unlike the "Help:Course Copy" page in blackboard claims, no other options (Enrollment, permissions, properties) were copied.
Tasks		Works as expected
Tests, Surveys, and Pools		<p>To copy over tests while keeping them deployed in a content area, all content areas in question and "Tests, Surveys, and Pools" and "Grade Center Columns and Settings" must all be selected.</p> <p>To copy over tests without keeping them deployed, just select "Tests, Surveys, and Pools". All copied tests will be undeployed.</p>
Wikis		Individual wiki pages not copied
